conc. 3. (Amended) An apparatus according to claim 1, wherein the measuring head, the reel, the feed device, and any possible electronics present near distal end are each incorporated individually in carrier members that can be moved through the pipe or tube.

4. (Amended) An apparatus according to claim 3, wherein the individual carrier members are sequentially interconnected by means of flexible couplings.

5. (Amended) An apparatus according to claim 4, wherein the flexible couplings are formed by hydraulic tubes with a steel covering.

6. (Amended) An apparatus according to claim 5, wherein the length of the hydraulic tubes is chosen in accordance with the flexural stiffness of the tubes.
